EDUCATION

University of California San Diego
Bachelor of Science in Computer Science
• UC Regents Scholar

La Jolla, CA
Sept. 2022 – June 2026

EXPERIENCE

CSE Department Research Assistant

September 2025 – June 2026

University of California San Diego

- Developed 1,000+ line Type Script code bases containing controlled logic and runtime bugs for research experiments.
- Designed and implemented six debugging tasks across unfamiliar software projects to evaluate structured methodologies.
- Collected and analyzed student task performance and debugging processes to evaluate effectiveness of testing.

Business Intelligence Extern

June 2024 – August 2024

Kern Health Systems

- Explored ways to visualize the information from two different sources for an upgrade project.
- Developed a working dashboard application using SQL code in SSMS, Microsoft Excel, and Microsoft Power BI.
- Collaborated with mentors to understand the data collection and queries needed for the development of Kern Health Care.

ACM Projects Team Lead

Jan 2023 - Mar 2023

University of California San Diego

- Created a visual guide and introduction to the MERN stack for students.
- Offered guidance and feedback on students' personal projects.
- Scheduled bi-weekly check-ins and designed meetings as Scrum Master.
- Engaged in research and collaboration of students' success towards project.

PROJECTS

Debugging Methodologies Research | *VSCode, Github*

Sept 2025 – Apr 2026

- Conducting research on debugging methodologies and their impact on undergraduate students' performance.
- Simulating a real-world experience to students by providing bugs through large codebases in a lab setting to solve and explain the processes using the methodologies taught in lecture.

KHS Power BI Dashbaord | *SQL, Microsoft Power BI, Agile Methodologies*

Jun 2024 – Jul 2024

- Created an interactive dashboard built to visualize claims data from multiple sources using Power BI and SQL.
- Programmed in Microsoft SQL Server and analyzed company's medical data to create an executive summary of ongoing company projects.
- Collaborated with multiple individuals to understand company's backend data of each department.

Developer Journal | *VSCode, GitHub, JavaScript, HTML, CSS,*

Mar 2024 – Jun 2024

- Portfolio: <https://github.com/cse110-sp24-group7/cse110-sp24-group7>
- Collaborated with individuals to create a calendar app that incorporates widgets and popups designed to a developer's needs.
- Programmed in Javascript, HTML, and CSS and used Junit testing to ensure the code compiled effectively and accurately for both frontend and backend.
- Led the Design Team, creating frameworks for the app pages, logo, and popup widgets to ensure user interface was clean, efficient, and easy-to-use.

ACM - STritons | *MongoDB, Express, React, Node.js, Github, VSCode*

Oct 2023 – Dec 2023

- Portfolio: <https://tinyurl.com/STRITONS>
- Built a website that introduced students to various exercises and specific routines, plan their workout and connect to UCSD's Rimal Gym
- Implemented continuous delivery of the frontend and backend using the MERN stack

TECHNICAL SKILLS

Languages: Java, Python, SQL, HTML/CSS

Frameworks: MongoDB, Express, React, Node.js, JUnit

Developer Tools: Git, Azure DevOps, VSCode, Github, Figma

Libraries: React, NumPy, Node.js
